

How does paying with SimplePay work?

You control how to pay.

As a SimplePay member, you pay your out-of-pocket costs to the health plan and not to your doctor, hospital, or pharmacy. You should not pay any out-of-pocket costs at the time of your service as indicated on your insurance ID card. You pay one statement while we pay your providers in full, which allows you and your healthcare providers to focus on providing you the care you need.
