Your Pharmacy Copay

The results below are based on your benefit summary. If your drug actually costs less, you will only be charged the cost of the drug. If you choose a preferred or non-preferred brand drug rather than the generic equivalent when the prescriber allowed a generic drug to be dispensed, you will also be responsible to the pharmacy for the cost difference between the generic and brand drug, which is not covered by the plan and will not accumulate toward your out-of-pocket maximum.
