

**SIMPLEPAY
HEALTH**

New advanced prescription search tool

We are excited to introduce an enhancement to our prescription drug price lookup tool. High deductible health plan members can now search an estimated retail cost for their prescriptions before meeting their deductible.

How to search for estimated prices

- 1** Log into your member portal on your desktop computer at www.simplepayhealth.com or via the mobile app.
- 2** Locate the “Find Drug Prices” card under the benefits tab and select “Start Now.”
- 3** Type the name of your prescription in the prescription drug price lookup tool. Select the drug name that your doctor prescribed.
- 4** Your “Estimated Retail Cost” is the approximate price you will pay before you have met your deductible. **Prices may vary by quantity and individual pharmacy.**
